<div align="center">**March Journal**</div>

HTML Team

I was in touch with Enosh about how the HTML was going. I saw what he had done and thought it looked nice and correct visually. My suggestion to change from the main page to the sports is the header picture. Since we do not have any sports facilities that belong to Alliance University, putting a soccer field, a basketball court, or a baseball field would be focusing on one sport. So we could design an image for the heading picture.
I will keep in touch with Enosh to help him with the HTML for the rest of the semester.

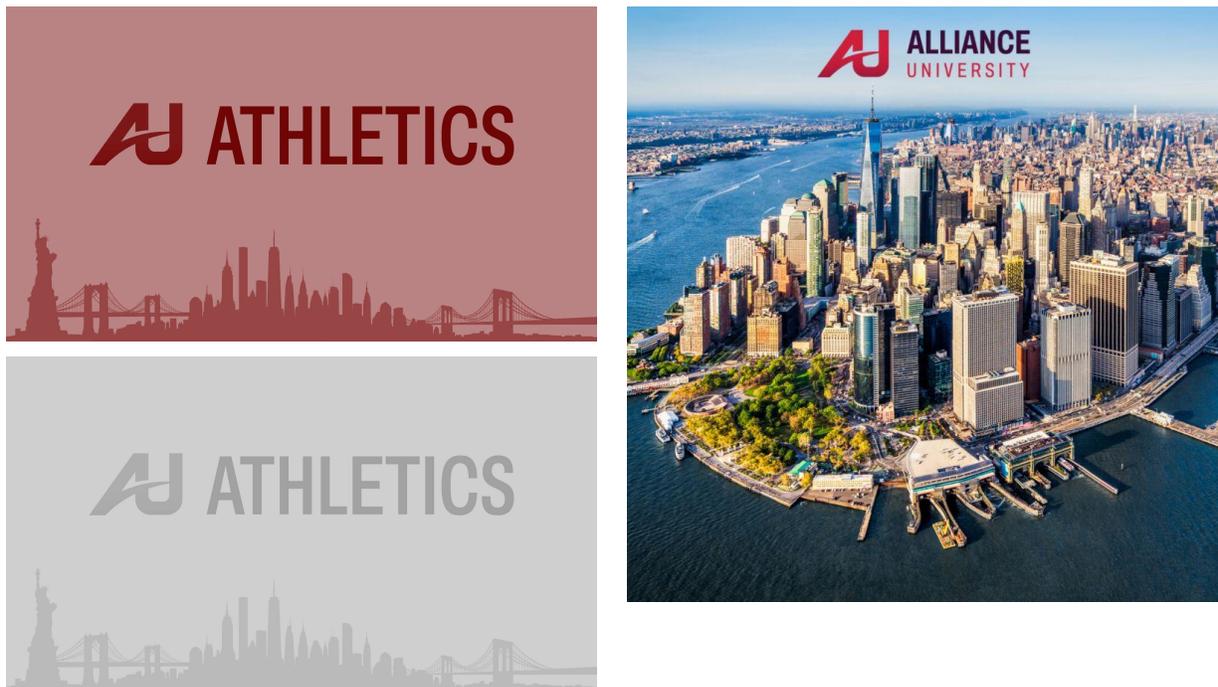

<div align="center">Figure 1: Examples of Heading pictures.</div>

Based on the Alliance University colors, instead of having the AU logo for each sporting event, we would add specific icons that symbolize each sport, for instance, a soccer ball for soccer, a baseball bat for softball and baseball, etc. To distinguish male and female sports, these symbols would have different colors **dark purple (#380D36)** for female sports, and the **reddish** color **(#D01F3B)** for male sports.

Baseball/Softball

Basketball

Soccer

Track & Field
(Indoor & Outdoor)

Volleyball

X-Country

Database Team
I was in touch with the database about the venues, and the addresses where each sport plays its respective games. I understand that everything was cleared up.

After analyzing the database, I concluded that it would be simpler if we combined women's and men's X-Country into one sport, and women's and men's Track & Field into one sport. This idea has been communicated to the team, and Shanice and I are waiting for the answer and thoughts about it.
