

Film and Response:

Josiah Cesar

This week you will be watching a film about the Mayan Civilization, *The Blood of the Kings*.

Address at least one of the following questions and place your response in the dropbox.

What were some of the technological innovations of this society?

The Maya civilization had many technological innovations that helped to define their people and culture. One of their innovations was their sophisticated writing system, which allowed them to record their history, religion, and everyday life. This writing system was also known as hieroglyphics inscribed on stone monuments, pottery, and bark paper.

Another technological innovation of the Maya civilization would be their advanced knowledge of mathematics and astronomy. The Mayans developed a complex calendar system that allowed them to track the movements of the sun, moon, and stars, and predict astronomical events accurately.

How did they help to define the people & their culture?

These technological innovations helped to define the Maya people and culture by allowing them to develop a complex society with an intellectual and spiritual tradition. Their writing system allowed them to record their history and beliefs, while their knowledge of mathematics and astronomy allowed them to make scientific observations and predictions. Overall, these technological innovations were central to the development of Maya civilization and continue to fascinate and inspire people today.
