Final Draft

This movie *Enemy of the State*; was directed by Tony Scott, and the actor was Will Smith it is a dying for to watch, because it teaches people about a lot of things that the government is hiding from people. Some people might think that it is a movie, wrong. Everything people see in that movie can happen in real life too. People this is a must see movie. In this movie people can see how far technology can go, and also people will be amazed at what technology can do. The congressman in the movie, the bad guy thought that he was smart and thinking that he can get away with murderer by using state-of-the-art technology on him prove that he was wrong. In this movie the congressman thought that the truth will never come out, but with one small camera he got caught. The director of this movie made multi millions of dollars, because when the film was first came out a lot of people rushed to see it at a movie theater.

This movie is on the greatest movie, even though there one part that people may not like about it but still it will blow watchers mind for example the middle of this movie where the actor was running and they can see what location he was running, even a toddler watching this movie, can see that it is imaginary, not real. It is like going from grade A+ to C; but at the same time it is an interested movie, and anyone who watch it always fall for this idea, where the actor went to buy these sexy lingerie, for his wife, and this when the actor notice that he was being followed by the FED. Here is good stuff people can learned from watching this movie. No matter how cautious you are, don't think that trouble is not going to knock at your door. What the writer is trying to say is that what happened to the actor Will Smith can happen to anyone. Someone does

not have to be a murderer to become a murderer. How the actor and his family's life got complicated because of one mistake, and that causes him and his family to live in a nightmare which they did not create. Anybody who watches this movie has a second thought about death penalty. Why because of what happened to the actor Will Smith. Even with the state- of- the- art technology still there are people who are on death row accusing for crime that they did not commit.

Good things about this movie are that if anyone commits a crime they will catch that person no matter where that person hide they will find that person, that is what the movie is basically about. Even though there are some people who refuse to learn, they think that they are invisible, If they commit a crime they aren't going to catch them all I can say to them is good luck, because no one's can out smart technology.

In this movie the powerful congressman thought that he was going to get away with murder. He even made everybody who were working for him lives miserable for the piece of that evidence, people who work for him could not sleep, could not eat they thought that he was in danger trying to help him out and he was a murderer.at the end of this movie, how the congressman got caught. Everybody who was working for him he made them look like fools, and they finally could see through him that he was a crook. To finish, why do people think the writer likes that movie so much? Because as she said before she can relate to that story, and she can also tell people that it is not only a movie, and it happens in real life, and it is about time they made a movie like this.

It is not an easy life when someone is being watched by the FED, those people they can make someone life a living hell. The sad part is they are unstoppable, if they pin something on someone, they will get that person, and they do not care if that person is innocent, they will never

give up following that person. What happened to the former president Donald Trump should not be happening, right now the way they treat him is shameful, they forget about that he was once president of this country. Still talking about what is in the movie. People should have compassion for him forget about what he did in the past. Sadly to say people who are after him, they not better than him well that is life, the writer advise right now the roads are slippery The best thing someone can do is not to let the FED know that person name even for good or bad cause. Once they got somebody name that is it. This movie shows it all, people who did not get a chance to watch it please do so, and people will never regret watching it.

Back to this film, it is a film if anyone's watching it once you will never getting tired of watching it. A movie like this people from all over the world is supposed to watch it, Because there are many good things people can learn from it. For example, how the congressman people invaded the actor home without a warrant. Picture this the actor and his wife were in the shower butt naked without knowing that there are cameras on the entire house. That is wrong for the congressman to authorize people to do so. This movie first time people are watching it. It makes them asking many questions, like do people really have privacy? If people not careful this movie can make them paranoid certain people, they do not feel comfortable to undress with lights one. They think that someone somewhere is watching them. The same thing that happened to the actor Will Smith happened to someone, and it was on TV the guy was not lucky as Will Smith was in this film the actor will smith found a professional helping him out, this guy case he had to commit suicide. He left a note and explaining to people that he knows that he was being followed by the fed in his note he said that he was innocent of what they accused him of he said there is no way he is going to live that kind a life, It is sad, but it happened in real life. So this movie is a must see movie, it will help people in many ways.
