Mayan Society

The Mayan societies were considered the most sophisticated and highly advanced for their time.

The Mayan civilization developed: Architecture, mathematics, a calendar, an astronomical system In a writing system. The culture of the Mayan was highly advanced for the time. The writing system of the mind is one out of five in the world, text describing the cosmos, and dreams and illustrating remarkable achievements. This utopian society was also known for astronomy, predicting the solar eclipse while tracking days, years, and seasons. To this day the cycle of the moon was predicted by the Mayans, but after 25 centuries it is only off by 33 seconds, today. The cultural framework of the Myan is higher learning, secret belief, and advanced pyramids with a sundial. The Maya weren't an advanced complex society, with numerous impacts in small centers of Advancement throughout its culture.
