Dropbox 10 – The Blood of the Kings

What were some of the technological innovations of this society? How did they help to define the people & their culture?

Knowing that the Mayans are one of the Mesoamerican civilizations that have been studied the most rendered the film highly educational. They are highly renowned for their contributions to mathematics, astronomy, medicine, and architecture. This includes the writing system they created. The film claims that this document is one of only five magically charged texts ever created in the history of the planet. These were described as cosmological descriptions and dream diaries. Beautiful, delicate Mayan manuscripts are a truly astounding feat of their people. It is an entirely original written language that is as significant as Egyptian hieroglyphs. They were present when the first written language in the new world was created. Furthermore, the ancient Maya society revealed indications of a sophisticated mathematics system that was eventually intimately linked to a sophisticated astronomical system. They documented their thorough observations of the night sky with astounding accuracy. Additional astounding discoveries were made known. The Mayan vases were captured on camera by one of the photographers. He successfully unrolls the continuous picture painted on the vases by rotating them in front of his camera. They unveiled messages that lead to a completely new understanding of the pre-Maya culture. Here are a few of the inventions that best represent and identify their incredibly rich culture. It's remarkable because if you start to comprehend the inner workings of Maya mind and how their society was built.
