Writing Assignment Chapter 25

For this assignment, I will use the film "*Independence Day*". There are two different Networks in the film that struggle for control. The humans that are struggling to defend their planet from a and the aliens who attempt a hostile takeover of their planet with the expectation of destroying all humans. The Hierarchies are the humans who inhabit the Earth and the Aliens who come from outer space. Humans live in a society where there are different cultures and groups of people. They survive by obtaining the goods and finance necessary for them to live and thrive in these societies. The aliens live on a foreign planet but are now in need of something that only the Earth can provide.

The aliens plot to destroy Earth and annihilate all humans by setting off a nuclear weapon.

However, the humans decide to fight for what is theirs. Both parties enter an all-out battle. The humans despite their differences form a united front and determine to defeat their enemy.

Although lives are lost on both sides, the humans win in the end because they realize their enemy's plot and use their weapons against them. In the end, the enemy is defeated, and humans redeclare their independence and vow to work toward starting over and preventing the enemy from invading their country again.
