

Thesis Summary Information (Part B)

1. What is your population of interest?

My population of interest are the student athletes at Alliance University.

2. What is your estimated sample size?

My estimated sample size will be at least 50 participants.

3. How well do you think your results will generalize to other groups, companies, etc.

I think my results will generalize to other groups very well because my two constructs are not limited to one specific area of life. They are applicable to not only sports but even work performance and general well-being.

4. What are potential lurking variables?

Some lurking variables include: General well-being, sports performance, self-confidence, self-motivation, self-belief, self-awareness, etc.

5. What confuses you the most about writing your thesis?

After gaining much more clarity and direction on my thesis, there is nothing that really confuses me at this point. One thing I find will be a bit challenging would have to be, the direction I take to tailor my scales to the thesis.
