The Mongols Reading

1)What were the failures? successes? of the Mongols?

One of the biggest failures was that Genghis Khan failed to make a singular political unit from his conquests. One of their biggest successes was their military which focused on speed and archery, they also rode horses pretty well.

2)What is one thing you found interesting/new about the Mongols?

One thing I found interesting about the Mongols was that they were very adaptable because even though they never knew completely what their opponents' game plan was, they decided to take prisoner of the opponents to gain information so they could attack strategically.
