

What were the failures? Successes? Of the Mongols?
What is one thing you found interesting/new about the Mongols?

Some of the failures of the Mongols is that they had smaller pastoral groups especially compared to the Tatars or the Uyghurs.

Some of the successes of the mongols is that they conquered more land in 25 years than the Romans did in 400. The mongols created international law and destroyed the feudal system.

One thing I found interesting about the Mongols is about the descendants of Genghis Khan. It interested me how there are 16 million descendants.
