

Kelsey McCann

1. What have you liked about the course?

What I liked most about this course is the fact that the professor really cared about our well-being just as much as our educational content. Another thing I enjoyed about this course was the fact that every class started with a bible verse that connected what we were learning to the bible. This was something that I was searching for and the reason I attended a Christian college in the first place. This class bridged the gap between biological aspects of social work to the faith based organization that we are being taught as well.

2. What suggestions do you have for improvement?

As I am writing this, I am truly trying to find a way in which this course could be better and one does not come to mind. This was one of the best courses I have had the opportunity to be a part of at Alliance University.

3. What have you done that has helped you learn effectively in this course?

The quizzes truly helped me learn and focus on the most important information in the chapters. Although they were tedious at times, they encouraged me to read the chapters and truly understand the knowledge.

4. What could you have done differently to improve your learning in this course?

To improve, I would have read more of the textbook. This textbook is truly an incredible resource and although I skimmed this enough to pass the quizzes and the class, I would have liked more time to truly read the textbook in its entirety.

5. What has the professor done that has helped you learn?

The professor is always willing to answer any questions we have as well as creating hands on activities to enrich our learning experience.

6. What could the professor have done differently to facilitate your learning?

Truly nothing. Professor Philbert was an incredible, supportive professor that was always here for her students and had a true passion for what she was teaching.
