Chapter 10-

2. Psychological Espionage is when a person who is part of the field and study of psychology tries to include a religious aspect in psychological and physical health. Religious Espionage is when a person with a religion doesn't believe in the supernatural aspect of religion but instead believes in Christianity's more realistic and natural attitude. I think Psychological Espionage is worse for Christianity cause they are very single-minded and have always thought religious aspects especially about the supernatural don't exist and go for the more scientific aspect.

8. A advantage that the Rebuilders model has on a Christian client is that it will help Christians understand that Christianity contains implicit psychology that is seen in the Scriptures and in many traditions. So the aspect of psychology should be used and seen as a positive. Now a disadvantage to this is that there may be Christians who will interpret certain feelings like depression and other mental disorders as this is how God created humans and not seek help in the way it needs to be addressed.

12. The neutral party model avoids many things from other parties but one that stood out to me was that it avoids theological imperialism also methodological disengagement of the Colonist model. Rebuilders are important to the secular foundations of contemporary psychology and reject theological and philosophical findings and beliefs on what is it to be a human. Also in the

rebuilder model, the present is not rejected and pushes for Christian Psychology to be part of Psychology and not segregated.

Chapter 11-

1. The Quote can be applied to the field of study of Psychology because a psychologist you want to be able to help others who are wounded not only physically but mentally and give them tools to be able to heal from any type of trauma past or present, to be a better person in the future. This quote shows that to be able to help others to heal and relieve the pain you and God need to work together and help the client.

3. When answering the three questions of “Where am I?”, “Where am I trying to go?”, and “How do I get there?” it is very simple and important to answer. When answering “Where am I?” I would answer I am in the presence of the Lord. When answering “Where am I trying to go?” I would say that I am trying to go on a path that God will help guide me to that can help me become a better person for my future. And when answering “How do I get there?” I would say I have to go out and seek the help I need and learn how to make myself physically and mentally strong to go where I want to go. These questions will help me frame the profession I want because in times when I might feel stuck in one place and don’t know where to go these questions will help me question what I want and need to go forward with the path that I am trying to achieve.

9. Integration in my personal life as a student would be very important to me but also very limited cause as much as I would want to dedicate my life to invest in personal integration it

would be hard to do that and as well not neglect the studies that I have to do to get my degree to have a successful future. Also, I know that my motivation to do it won't be as high as others and won't make it a priority in my life.
