Reflection 14

What have you liked about this course?

I loved going through the lifespan stages of life. I have learned to look at the importance of thinking about the stages of life with my clients. It helps to meet them where they are in life, what they are going through, and why.

What suggestions do you have for improvement?

I do not see any need for improvement. The syllabus was a bit off but the professor provided prompt feedback and corrections in a timely matter.

What have you done that has helped you learn effectively in this course?

I learned how important case scenarios are used as a teaching tool. Working in small groups is helpful; I learned a lot from my classmates as well.

What could you have done differently to improve your learning in this course?

It would have helped if I researched more on how to apply certain theories and review the course reference sheet on other resources on the topics I learned in class.

What has the professor done that has helped you learn?

Prof. Philbert has prayed for me (and the class) and has the gift of encouragement. I had an exciting time in her class.
