

As we prepare for the close of this semester, I would like to give you the opportunity to provide your thoughts about the course in addition to the survey you receive from the college. Your feedback will be considered for the revision and improvement of the course. This reflection assignment will not be graded.

1. What have you liked about the course?

In the course, I loved how the teacher taught, and we did the class lessons. The way the class was formatted helped me learn a lot about human behavior and dumbbed it down for me.

2. What suggestions do you have for improvement?

The class was great. No improvements.

3. What have you done that has helped you learn effectively in this course?

I used the reading and the class time to understand human behavior more fully through the lifespan. I would apply what I have learned at my internship and in real-life participation. I loved how you integrated faith and social work in real-time with what with whatever we were learning.

4. What could you have done differently to improve your learning in this course? I could have managed my time better and learned to deal with family and school situations better. Not let one affect the other

5. What has the professor done that has helped you learn?

The professor was professional, spiritual, and funny. She taught the material barney style so I could understand and learn.

6. What could the professor have done differently to facilitate your learning?

N/A
