

Durotimi Tijani

Music Business

Chapter 14

5/1/2023

1. Streaming often provides lower-quality audio than downloads because the streaming files are usually compressed for better transmission flow and it is not permanently stored on the consumer's device.
2. Streaming began to emerge as the Third Age of something called the nonphysical digital music revolution. There was an outbreak of piracy misappropriating copyrighted music. Streaming now is dynamic and has quickly evolved into new directions, an example of this would be iTunes.
