10-point Response

5/2/2023

This video touches on how to start a record company with 600 dollars. The speaker says to start an LLC which costs 130 dollars in the United States. He also encourages to get a suite address which usually costs 10-13 dollars a month. A few other steps that he mentioned were getting a Distro Kid account, signing an act, exploiting your 6 rights, license, focus on your company, and contract. This video was very insightful and helpful for me to understand the necessary steps to start a record company in a legal way.
