**Human Behavior in the social environment 2**

**5/ 1/ 2023**

**Reflection #14 Course Feedback.**

**This had to be the best course of my entire experience in AllianceU, unfortunately this was an online course. The material that was discussed in SWK354/554 Human Behavior in the Social Environment 2 is so beneficial for everyone to know that I only wished I had taken it in a classroom setting. This course gave me a wide range of information that allowed me to counsel my field practicum participants at a much higher professional level and recognize the complexities of human behavior, especially when it comes to the social environment.**

**During this course, I enjoyed learning about each stage of human life and their different factors that are associated with each stage. This course was filled with knowledge and information that is useful to the social work profession. The chapters that grab my attention the most had to be Chapter 7 “The Multidimensional Factors of Adolescence” & Chapter 10 “The Multidimensional Factors of Late Adulthood & Very Late Adulthood Stages”. These chapters allowed me to be able to analyze various situations that I did not know people actually go through. It also allowed me to develop a greater sense of compassion and understanding to adolescents and people that are in their late adulthood.**

**However, I personally felt that every subject that we studied was jammed in which caused me to neglect certain topics that caught my attention due to the sake of time. I would consider taking some time to reread the material that we went through to acquire a better understanding and be able to render a better service to my clients.**
