

_____ refers to a developmental process which culminates in the production of erythrocytes.	--	▼	
_____ refers to the dynamic process of production and development of the various blood and marrow cells.	--	▼	
_____ refers to a developmental process which culminates in the production of neutrophils, eosinophils, and basophils.	--	▼	
_____ refers to a developmental process which culminates in the production of macrophages.	--	▼	
_____ refers to a developmental process which culminates in the production of lymphocytes.	--	▼	
_____ refers to a developmental process which culminates in the production of platelets.	--	▼	
Granulocytes	--	▼	
Lymphocytes	--	▼	
Erythrocytes	--	▼	
Platelets	--	▼	

Each arrow and box represents a collection of items belonging to a specific Matching question. Instead of having TWO questions which are Matching, one acquires ONE question which is Matching. The system is “merging” both questions into one question. Is there a way to fix this so that I can have multiple questions which are Matching?

Thank you.

Michael
