Training Module 130 Quiz  
Basic First Aid  
Signs and Symptoms

100%

Employee Name: Sarah Kerber

Date of Quiz: 6/22/20

Directions: Upon completion, return the quiz and attached Training Summary Form to your supervisor for review.

Complete the questions below after viewing the DVD First Aid (American Red Cross):

1. There are two categories of first aid treatment:

- a. Minor Injuries that do not require emergency medical assistance
- b. Temporary Aid to stabilize the victim until professional medical assistance arrives

2. (Select all that apply) When you become aware of an emergency situation, take the following actions):

- ☒ a. Remain calm
- ☒ b. Assess the situation for further risks to yourself and others
- ☒ c. Administer first aid
- ☒ d. Contact emergency assistance, if necessary

3. (Select one response) When phoning 911 for help, you should stay on the phone with the dispatcher until:

- ☒ a. The advanced medical team arrives
- ☒ b. The dispatcher tells you it is okay to hang up (the caller is the last person to hang up)
- ☐ c. The injured person's supervisor is notified.

4. Checking the victim's vital body functions can be accomplished by what is commonly referred to as the ABCs. What does ABC stand for?

- ☒ a. Airway, breathing, consciousness
- ☐ b. Airway, blood pressure, circulation
- ☒ c. Airway, breathing, circulation

5. When the victim is unconscious, you should first:

- ☒ a. Check if the victim has a bracelet, necklace, or card identifying any medical condition that may have caused the current situation
- ☐ b. Check around the area to see if anyone knows what happened
- ☒ c. Survey the scene for possible causes
- ☐ d. Make sure the area is secured

6. You should never move a victim unless his or her life is in danger. TRUE ☒ or FALSE ☐

7. An injured person is becoming pale, cold, and sweating. These can be symptoms of shock. What is the appropriate treatment?

- ☐ a. Give the person a drink of water
- ☒ b. Help the victim lie down and keep warm covering with a blanket
- ☐ c. Leave the area so the victim can rest

Complete the questions below after reviewing the First Aid/Signs & Symptoms curriculum

8. List first aid priorities.

- Rescue
- Control bleeding
- Ensure airway and give CPR as necessary
- Treat poisoning or ingestion of harmful chemicals
- Call 911 if life threatening situation occurs

9. A service recipient comes to you holding her left arm which is bleeding from a laceration above the elbow. What are the first steps you take to control the bleeding?

~~Stop bleeding immediately. If severe bleeding, apply pressure until bleeding stops.~~

10. Ima Hurt has been stung by a bee on her left calf. Upon examination you are able to see the stinger is still present. Describe your treatment and aftercare for this injury.

~~Remove stinger by scraping gently across the area. Apply ice for swelling/pain and then wash for allergic reaction.~~

11. Jill Jackson comes in from a long winter walk. She appears very lethargic and is complaining of a headache. Her skin appears pale, and is clammy to the touch. Based on this information, which of the following conditions would you suspect?

- Hypothermia
- Heat exhaustion
- Heat stroke
- Frostbite

12. Describe your actions in treating the condition identified in question #11 (above):

~~Give sips of salt water 1/2 glass every 15 minutes over 2 hour period. Have individual lie down and raise feet 8-12 inches and apply cold wet cloths.~~

13. Julia Kidd is assisting you in preparing dinner when her hand is scalded with hot water. What is your initial action? Put in cold water until pain subsides. Apply sterile dressing. Don't break blisters. Use ointment, cream or salve.

~~then notify health services~~

14. During a picnic, Darrell and Frank are playing catch with a softball. Frank misses the ball and it smacks him in the nose. Frank's nose begins to bleed profusely shortly after the impact. What do you do for Frank?

Apply direct pressure by pinching both nostrils shut. Sit down and lean forward. Pinch for 10 minutes. If bleeding doesn't subside it may need to be packed by a doctor. Do not rub or blow nose.

15. You notice that Julia's arm has been splashed with grease, blisters are developing, and it is becoming red and mottled. What type of burn is this, and how would you treat it?

Second degree burn. Put in cold water until pain is gone. Use sterile dressing. Don't break blisters or use any type of ointment. Notify health services immediately.

16. After first aid procedures have been implemented for an accident or injury that does not require physician treatment, and the situation is under control, what follow-up steps should be taken for reporting and documenting the accident or injury?

Notify legal representative or supervisor then complete injury report.

17. Identify two sources that you can use to obtain additional first aid information:

Nurse  
First Aid materials

18. Please identify any questions that you have at this time regarding basic first aid:

N/A
