Please complete and return to your licenser for training credit and certificate

Joe Ganzer

1. Name three of the mental health diagnoses discussed.

ODD, RAD and FASD

2. Autism is a neurologically based disorder of development.

3. One in five teens has Depression.

4. Threats of suicide have three of the five "dos". Name them: seek pro help, take it seriously,
know who to call for help

5. Name two diagnoses depression can present with: PTSD and RAD.

6. Many of the symptoms of Anxiety can be mistaken for depression.

7. Most foster children have extreme or layered PTSD.

8. A child develops Coping SKILLS that look like "symptoms" when they come to your home.

9. Name three of the six components to a Post-Traumatic Stress Disorder (PTSD) action plan.

Stay calm, have a meltdown plan, know what comforts the child

10. Attention Deficit/Hyperactivity Disorder (ADHD) clinical characteristics become more problematic during middle school years.

11. Attachment patterns are formed in the first 3 years of life.

12. Children diagnosed with Reactive Attachment Disorder (RAD) treat the caring adult as if (name two):

they had been the abuser and they were responsible for all the pain the child feels

13. Fetal Alcohol Spectrum Disorder (FASD) is a life long prognosis.

14. Grief continues to be the most common reaction from parents who are raising children with mental illness.

15. We often compromise a child's dignity as we discuss their challenges and our frustrations.

16. Name three of your six resources when caring for children with mental health concerns:

School, doctors and parents
