PAI

SERVICE OUTCOME AND SUPPORT

Name: Richard McDole   Outcome #: 1
Date of development: 1.16.2020
Projected start date for implementation: 1.20.20
Date by which progress towards accomplishing the outcome will be reviewed and evaluated: July 2020

Outcome statement with measurable and observable criteria for outcome achievement:

Richard will have a conversation in the community with a store employee.

Methods or actions that will be used to support the person and to accomplish the outcome:

1. When in the community, Richard will engage in a reciprocal conversation with a store employee such as asking how their day is going.
2. If Richard does not engage in a reciprocal conversation in the community, staff will use a verbal question prompt of "Richard, would you like to ask the employee anything?"
3. Richard will receive a "Yes" if he has a reciprocal conversation while in the community.
4. Richard will receive a "No" if he does not have a reciprocal conversation, or needs additional prompting to do so.

Richard enjoys interacting with others, though tends to defer to interact only with PAI staff when in the community.

Changes or modifications necessary to the physical and social environments: Outcome will be run in the community.

Equipment and/or materials required: None needed.

Techniques that are used that are consistent with the person's communication mode: Richard communicates verbally.

Techniques that are used that are consistent with the person's learning style: Richard learns with verbal instructions paired with visual and hand-over-hand assistance.

Data collection method:

Data will be collected on day's Richard spends time in the community. Richard will receive a "Yes" if he independently has a reciprocal conversation while in the community. Richard will receive a "No" if he does not have a reciprocal conversation, or needs additional prompting to do so.

Names of staff or positions responsible for implementing the supports and methods: Lead DSP, DSP

SERVICE OUTCOME AND SUPPORT

Name: Richard McDole   Outcome #: 2
Date of development: 1.16.20
Projected start date for implementation: 1.20.20
Date by which progress towards accomplishing the outcome will be reviewed and evaluated: July 2020

Outcome statement with measurable and observable criteria for outcome achievement:

Richard will initiate conversation with others.

Methods or actions that will be used to support the person and to accomplish the outcome:
1. Richard will initiate a conversation with others by gaining the attention of the person prior to beginning to talk.
2. If Richard starts to talk without initiating the conversation, staff will ask Richard who he is trying to talk to.
3. Staff will prompt Richard to initiate the conversation.
4. If Richard does not initiate at this point, staff will assist Richard in initiating the conversation with that person.

Richard enjoys interacting with others and is very social. Richard tends to start talking without initiating with the person he would like to speak to, often leading to them not responding. This outcome will help support Richard in successful interactions with others.

Changes or modifications necessary to the physical and social environments: None needed.

Equipment and/or materials required: None needed.

Techniques that are used that are consistent with the person's communication mode: Richard communicates verbally.

Techniques that are used that are consistent with the person's learning style: Richard learns with verbal instructions paired with visual and hand-over-hand assistance.

Data collection method:

Data will be collected daily. Richard will receive a "Yes" if he independently initiates his conversation with others. Richard will receive a "No" if he does not initiate the conversation (i.e. just starts talking) or needs additional prompting to do so.

Names of staff or positions responsible for implementing the supports and methods: Lead DSP, DSP
