

SERVICE OUTCOME AND SUPPORT	
Name: Olivia Moore	Outcome #: 1
Date of development: 5/28/2020	
Projected start date for implementation: 4/5/21	
Date by which progress towards accomplishing the outcome will be reviewed and evaluated: 4/5/22	
Outcome statement with measurable and observable criteria for outcome achievement: Daily, Olivia will get her nutritional supplement and bring it over to the medication table. Olivia will independently hold onto her syringe during feeding for 12 month overall average of 55% or more of all trials.	
Methods or actions that will be used to support the person and to accomplish the outcome: Staff will prepare Olivia's nutritional supplement and syringe. Staff will prompt Olivia to pick up her supplement and bring it to the medication area. Staff will hand Olivia her syringe, and prompt her to hold the syringe while staff administers her nutritional supplement.	
Changes or modifications necessary to the physical and social environments: Olivia will run this outcome in the med area of her program room.	
Equipment and/or materials required: Olivia's nutritional supplement and syringe are required.	
Techniques that are used that are consistent with the person's communication mode: Olivia communicates via vocalizations, body language and gestures, and facial expressions.	
Techniques that are used that are consistent with the person's learning style: Olivia's learning style appears to be auditory, visual, and kinesthetic.	
Data collection method: Data will be collected daily after the outcome is run.	
Names of staff or positions responsible for implementing the supports and methods: DSP, Lead DSP, and Program Supervisor.
