

SERVICE OUTCOME AND SUPPORT

Name: Kim Varness	Outcome #: 1
Date of development: 4.12.2021	
Projected start date for implementation: 4.19.2021	
Date by which progress towards accomplishing the outcome will be reviewed and evaluated: September 2021	

Outcome statement with measurable and observable criteria for outcome achievement:

Once daily, Kimmy will choose a 1:1 activity to do with staff such as art, game, or sensory box in 75% or more trials over the next year.

Methods or actions that will be used to support the person and to accomplish the outcome:

Participating in a 1:1 activity will be trialed daily.

Staff will approach Kimmy in an upbeat tone. She will be shown the various activities planned for the day using the iPad or physical items. Staff will let her know that they can spend additional time working together on the specific topic of her choice. If Kimmy makes an activity choice, this outcome will be documented as "Y" for achieved and Kimmy and her staff will work together to complete the selected activity. If Kimmy does not make a choice staff will ask her again later in the day. This time, if she does not make a choice, this outcome will be documented as "N" for not achieved.

If Kimmy does not pick one of these activities, she may be asked about each option individually. She may indicate 'yes' to an option by establishing eye contact, making vocalizations, and/or facial expressions.

Changes or modifications necessary to the physical and social environments:

Kim may become overstimulated in loud/busy environments indicated by yelling, spitting, pinching, hitting, or grabbing at others. Should this occur, she will be assisted to a less stimulating area prior to asking her to practice this skill.

Equipment and/or materials required:

Kimmy needs the iPad set for her choices, or physical items representing the tasks of choice.

Techniques that are used that are consistent with the person's communication mode:

Kim communicates non-verbally using facial expressions, vocalizing, and waving. Kim knows adaptive signs for eat, more, drink and yes but does not use them consistently. Kim communicates by touching people or things she would like & pushing away items she is not interested in. Kim prefers to be provided choices that honor her known preferences. Kim is able to understand and respond to short concise verbal cues and phrases in English; she prefers an upbeat tone from caregivers and time to process requests.

Techniques that are used that are consistent with the person's learning style:

Kim enjoys completing tasks for herself, she learns through routine and repetition. She is best supported with verbal prompts, staff modeling prompts, and at times benefits from physical prompts. Kim is less receptive to hand over hand supports.

Data collection method:

Documentation will be recorded daily. Charting will include a "Y" indicating a successful trial or "N" indicating an unsuccessful trial.

Names of staff or positions responsible for implementing the supports and methods:

Program Supervisor (PS), Lead Direct Support Professional (LDSP), and Direct Support Professionals (DSP).
