| <b>Release from Hair Pull</b> |                      |                             |
| Two Handed Outside            |                      |                             |
| Rear                          |                      |                             |
| <b>Escorts</b>                |                      |                             |
| Simple                        |                      |                             |
| Wrist Grab                    |                      |                             |
| Cross Arm                     |                      |                             |
| 2 Person Come A-Long          |                      |                             |
| <b>Containment/Takedowns</b>  | 1-30-23 Full speed   | BT                          |
| Arm Bar                       | ↓                    | ↓                           |
| Side Lying Position           | ↓                    | ↓                           |
|                               |                      |                             |
|                               |                      |                             |

Always caution force required depending upon client  
Therapeutic Intervention and Personal Safety Training  
*Providing Safety for Self and Others*

Within 60 days of hire the program must provide instruction on the following topics: All of these topics are covered within the verbal portion of Therapeutic Intervention class.

- a. Alternatives to manual restraint procedures, including techniques to identify events and environmental factors that may escalate conduct that poses an imminent risk of physical harm to self or others;
- b. De-escalation methods, positive support strategies, and how to avoid power struggles;
- c. Simulated experiences of administering and receiving manual restraint procedures allowed by the program on an emergency basis;
- d. How to properly identify thresholds for implementing and ceasing restrictive procedures;
- e. How to recognize, monitor, and respond to the person's physical signs of distress including positional asphyxia;
- f. The physiological and psychological impact on the person and the staff when restrictive procedures are used;
- g. The communicative intent of behaviors; and
- h. Relationship building
