14

DYSENTERY

Diarrhea	Dysentery
Diarrheal infection is located and targets only intestinal lumen and upper epithelial cells.	Dysentery not only upper epithelial cells are targeted but colon ulceration also results.

32

CHOLECYSTECTOMY

An anatomical illustration of a human torso showing a surgical incision in the right upper quadrant. The gallbladder is highlighted in green and is being held by surgical forceps. The surrounding abdominal muscles and skin are shown in a realistic, shaded manner.

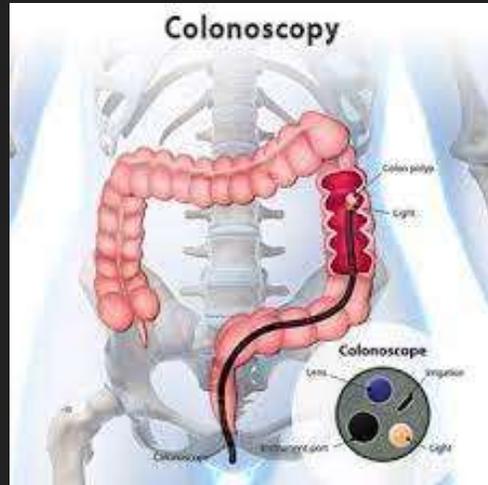

33

**CHOLECYSTOGRAPHY
(ORAL)**

An oral cholecystogram (OCG) X-ray image of the abdomen. The image shows the skeletal structure of the spine and ribs, along with the soft tissue outlines of the gallbladder and biliary system. The gallbladder is visible as a dark, rounded structure in the right upper quadrant. Technical markers at the bottom of the image include 'DRE' and '00PO PASTO 54'.
