GONORRHEA

Gonorrhea
Signs and symptoms

The diagram illustrates the signs and symptoms of gonorrhea in both females and males. It features two anatomical diagrams: one for a female and one for a male. The female diagram shows the internal reproductive organs, including the uterus and ovaries, with red dots indicating inflammation. The male diagram shows the urethra and testicles, also with red dots indicating inflammation. To the left of the diagrams, there is a circular inset showing a microscopic view of Neisseria gonorrhoeae bacteria. Text labels describe various symptoms for both genders.

Neisseria gonorrhoeae

Lower abdominal or pelvic pain in females
Bleeding between periods in females
Spotting after intercourse in females

In female

In male

Greenish-yellow or whitish discharge from private parts (in females) & penis (in males)
Coccyx (with redness, itchiness in eyes)
Swollen glands in the throat (due to oral sex)
