

Reading Hospital School of Health Sciences  
Medical Imaging Program  
MI 238: Clinical Seminar III

**Foot & Elbow Review and Critique**

This lab activity was created to provide students with an opportunity to review and see commonly repeated procedures by students. During this review, faculty will demonstrate common errors performed during a foot and elbow procedure and/or position a “patient” to match the student’s assigned image for the student to correctly modify the position. In addition, students will practice positioning and anatomy identification.

**Student expectations:**

- Each student will have an opportunity to position one to two views of each procedure.
- Students will be assigned a view of a foot and an elbow image to form a critique prior to the review.
  - Images can be found on Edvance: MI 238/Lessons/Foot and Elbow Review. Please see the below chart to know which image you are assigned to critique.
- All students will come prepared to share their critique of the assigned image on the day of the review.

**Elbow Review:**

- Groups A&B 1/10/23 1415-1545

**Foot Review:**

- Group A&B 2/2/23 1415-1515

Group	Student	Elbow Critique	Foot Critique
A&B	Cameron Clemens	#4 & #5	#1 & #2
	Kimberly Kauffman	#2 & #3	#3 & #4
	Lydia Stum	#6 & #8	#5 & #6
	Makayla Horvath	#4 & #5	#1 & #2
	Tiara Escueta	#2 & #3	#3 & #4
	Scott Murphy	#6 & #8	#5 & #6
