**DA North Update for Staff Meeting 9-20-2012**

**Susan** – Is currently experiencing a large amount of pain in her hip area due to a recent spread of the cancer to her femur and pelvic area. Currently Susan is trying to manage the pain with Vicodin however it isn't proving her much relief. Since Susan is so private about her issues, she has not been providing her doctors with information about the increase in pain. House staff started to notice Susan couldn't walk or transfer as easily as she had before which prompted them to take her to the doctor. The cancer spread was discovered late last week after x-rays were taken. An increase in sleeping at her computer has been noted. Out today due to pain.

**Tracy**- Doing the same as always. No changes

**Denise**- Doing the same. She is signed up for a month long Work Readiness program at Courage Center starting in late October. The program will be 3 days a week. Denise plans on working at Rise the other 2 days.

**Laurie**- Chemo is taking a toll on her. Work attendance has been averaging 2-3 days a week. Increased accidents, both bladder and bowel. Developed an infection in her foot. Now using her wheelchair consistently at work. Will push away from her computer to take brief rest breaks.

**Mike**- Doing the same. No changes

**Brian**- Still at a reduced work day (2 hours). A decrease in seeking constant emotional support from staff and co-workers noted. A very slight lift in mood after an increase in Prozac. No reports of self induced vomiting for about 1-2 week now. New SILS staff in place. She has been working with Brian for about 3 weeks. PCA staff has been consistent since former long time PCA left without notice in July. PCA noticing an increase in falls/abrasions when Brian is home alone. Social working has started the group home search for Brian. Parents in the process seeking guardianship.
