

Program Synopsis

The following is a brief synopsis of our program and treatment philosophy. We base our program on the belief that each person deserves an opportunity to flourish.

We have a loose active program basis that encourages daily routine but lacks rigidity. We demand safety above all else and have the heartfelt belief that given positive alternatives in life our clients will consistently choose a path of safe behavior.

We believe that clients do not fail out of programs rather than programs fail clients. With this belief we assess and structure the daily routine of each client based on their specific needs and capabilities.

Our facility is designed for security. We are in a very rural setting. We account for all property on the premises each day. We have staff that are clinically sophisticated and prepared for a wide variety of behaviors.

We structure our home environment in such a way as to promote loyalty and ownership with our staff and clients. We believe home is where the heart is.
