

# Apologia Biology Module 2: Kingdom Monera

Vocabulary from Module 2 of Exploring Creation with Biology (2<sup>nd</sup> Ed.)

By Dr. Jay Wile and Marilyn F. Durnell

www.CrosswordWeaver.com

## ACROSS

- 4 The DNA and other essential parts of a bacterium coated with several hard layers
- 7 A temporary union of two organisms for the purpose of DNA transfer
- 8 Organisms from the same species that have markedly different traits
- 10 An organism that does not require oxygen is an \_\_\_\_\_ organism.
- 12 Population growth that is unhindered because of the abundance of resources for an ever-increasing population is \_\_\_\_\_ growth.
- 13 A state in which members of a population die as quickly as new members are born is known as the \_\_\_\_\_ state.
- 14 An organism that requires oxygen is an \_\_\_\_\_ organism.

## DOWN

- 1 The transfer of a DNA segment from a nonfunctional donor cell to that of a functional recipient cell
- 2 Population growth that is controlled by limited resources is \_\_\_\_\_ growth.
- 3 The process in which infection by a virus results in DNA being transferred from one bacterium to another
- 5 An organism that causes disease
- 6 An organism that feeds on a living host
- 9 An organism that feeds on dead matter
- 11 A small, circular section of extra DNA that confers one or more traits to a bacterium and can be reproduced separately from the main bacterial genetic code
