

NOVEL-SONGLIST PROJECT

STEP 1:

From the assigned novel, identify a total of 10 items. These 10 can be characters, themes, symbols, motifs, or moods/tones of the novel. The 10 items may be from one of these categories or a combination of the categories. For example, you might choose 10 characters, or you might choose 4 characters, 2 themes, 2 symbols, and 2 moods.

STEP 2:

After making your choice, choose 10 songs (1 for each item) that you would associate that item with. Identify the item and the song and the artist. Then, in a paragraph explain how and why this song and item are related. What message, words, or qualities does this song portray that links it to the item you have chosen? You can type this up in Word or Google Docs and then upload. **(Worth 60 point)**

STEP 3:

Make a playlist of the songs and create a list of them on Spotify and send me the link. (Please remember that the songs should not contain any inappropriate language. They should be school-appropriate.)

Include this link at the top of the document in STEP 2. (Worth 10 points)

STEP 4:

Design a cover for this virtual CD that portrays this novel and the song choices. You can design via a computer, or by using actual art materials and then upload the image. **(Worth 30 points)**
