

Experiment 3.7 Air Exerts Pressure

Julia W.

- 2 balloons
- String
- Your face
- Tape

Procedure:

- Blow up the balloons & tie them
- Tie the string to each balloon
- Hold up the balloons evenly
- Blow between the balloons

Hypothesis: If I blow in between the balloons, then I think that they will move toward each other.

Conclusion: When we blew in between the balloons, they moved toward each other.
