

# Background Research and Bibliography

Name \_\_\_\_\_

## **Background Research:**

Write a background research section for the topic you circled. This section will be used to help you make a hypothesis. To start, collect facts that are related to your research question. How did you come up with your idea? What have you learned about your question? Spend time learning more about your topic.

---

---

## **Bibliography:**

List all resources where you researched the information for the ONE topic that you circled. Books, websites, etc... If you came up with this idea on your own, you should also have done research on others that may have also performed this experiment. List those resources here.
