

Formula Triangle Foldable

Step 1: Cut out the circle.

Step 2: Find center and lightly mark for reference.

Step 3: Pick any edge on the circle and fold it towards center – make a crease.

Step 4: Pick the opposite edge of the paper and fold towards the center overlapping edges and forming a cone shape – crease edge.

Step 5: Fold the final edge down towards the center forming an equilateral triangle. Glue into your Science Interactive Notebook and fill in the definitions.
