

Study guide

1:

mod: 9

A: A point against which position is measured

B: measurement that contains directional info

C: measurement that doesn't contain directional info

D: The amount of change in velocity

E: falling by only gravity's pull

2: No?

3: yes

4: A: the girls / B: the child C: the first girl

5: 5 mph

6: 250 mps

7: A: (S) distance B: (V) velocity C: (S) speed
D: (S) none E: (V) velocity F: (S) speed

8: -12

9: 0

10: 6

11: -2.5

12: there's multiple forces around the earth

13: the forces have less effect
