

## Week 1 asl homework paragraphs

My favorite hobbies are gaming and working on my car. I don't think working on my car would change much while being deaf because it does not include hearing too much unless you did not install something right and it is rattling. I think that gaming would change a good amount. I believe this because it would just be weird because i am so used to being a hearing person that it would just feel extremely unnatural. For these reasons I am glad I am a hearing person.

I watched my favorite tv show in captions, only it was weird. It felt very odd. It made watching tv a lot less enjoyable because it takes one of the main things out of it. I don't think it would feel unnatural because I would have never watched a tv show with sound. This is another reason i am grateful that i am a hearing person.
