

Beowulf Reading questions 13

1. Blood feuds are still alive and death of Beowulf left the people vulnerable. Beowulf was shown as a Christ figure but couldn't save his people from all their enemy's. Now that he's gone the creatures will take advantage of any opportunities that they can get.

Beowulf ended his life avenging himself. None of his people had to pay for his death. Beowulf managed to keep Blood feuds inactive but couldn't erase them. By dying he leaves his people vulnerable and all their enemies will seize opportunity. Beowulf could not save them from everything like Christ can showing he is not a perfect Christ figure example.

2. There was a burial of kings in both the stories, Beowulf and Thorin. They also both died sorrowing in treasure. That's all I could notice myself.

Beowulf was heaped in treasure, Thorin had the Arkenstone laid on his chest and the eleven-sword placed on his tomb. Dain (the new king under the mountain) delted his treasure well which sounds like Saxon ring giving. They went back to Mead-halls and told stories on stories.
