

State Park Project - Due Friday, January 28th

Create and name your very own State Park on an 11*17 piece of paper (construction sized)

(Please focus on neat work that is fully legible.)

First, choose which state you would like it to be in—and an area of the state to locate it.

(Remember, it cannot be in a city—state parks are in the country/wilderness) :)

Then draw a map of the park, including such items as:

- River or lake - at least 1
- Trees native to the area—2 or more (what kind/what do they look like?)
- Flowers native to the area - 2 or more (what kind/what do they look like?)
- Animals native to the area - 2 or more (what kind/what do they look like?)

You may use photos or clip art for some of this project, but do plan on drawing some yourself.

Helpful Hint: *Lookup a State Park that you are already familiar with to see how they designed their state park. Every state park usually has a map. You do not need to provide a key or overly detailed specifics. Focus on the Geography of the land and what is native. Be sure not to make up what is native, but do your research on the specific state and area you choose.*
