Huckleberry Finn

Huckleberry Finn is one of Mark Twain's most famous books and is considered one of the great American Novels. It was printed in 1884 in the United Kingdom. The book takes place in rural Missouri in the 1830s-1840s. Huckleberry Finn, the main character in the book, is an adventurous boy who found himself in the midst of kidnappings, survival, and friendships.

One of the most exciting parts of the book is when Huckleberry Finn gets kidnapped by his dad. His dad locks him in a cabin far from town in the woods. While Huckleberry Finn's dad was asleep, he escaped through a hole he dug through the ground. He made a raft and sailed on it down the river.

Huckleberry Finn was determined to survive. He had to hunt and fish to get food. He also ended up bumping into his aunt's slave, Jim, who had run away the same night. Huckleberry Finn liked Jim and they partnered up and agreed to not rat each other out. From then on Huckleberry Finn and Jim fished and hunted together.
