

Name: _____

RAFTs for Equations

A RAFT is an art form created from the perspective of various concepts covered in class. You will be assuming the *role* listed and covering the topic covered to an audience through the given format.

Choose one situation from the list below or create your own (see teacher for approval before starting your RAFT)

Role	Audience	Format	Topic
Variable of a one-step equation	Numbers of a one-step equation	Story told through Scratch program	Why I want to be alone
Subtraction sign	Numbers following a subtraction sign	Argument told through a documentary on iMovie	Why must you always be negative?
Narrator of "Algebra for Dummies" book	Reader of the "Algebra for Dummies" book	How-To Guide (chapter in book)	Solving an inequality containing a variable
PEMDAS	Terms of an expression	On-line Club Membership Form	How to Join My Club
Parentheses	Terms in an equations	Dear John Letter	Why I have to disappear
Rapper	Concert attendees	Song	Tips for Solving equations
A variable in an Equation	Given Values	Singing telegram	Come take our place!
Oprah	Equation	Advice Column	How to Stay Balanced
