

## Changing Demographics: Data, Data, Data Census and Me

**Lesson Rationale:** The overall essential question is: How are demographics changing both locally and nationally? For this lesson students will interpret census data to identify how demographics are changing in the various regions. Students will analyze demographic information for their own school district (Fayetteville-Manlius School District), the local county (Onondaga County), New York State, and the United States. This gradual expanding of geographic regions will allow students to gain a wider perspective of how their local demographics compare to national demographics. My goal is for students to analyze demographic data to increase their understanding of racial diversity and to explore how race statistics are changing. Students will determine the percentage and the percent change based on race and ethnicity. This activity will increase students' understanding of ratios and proportions. I modified and adapted this lesson from the resource: "Expeditions in Your Classroom for Common Core State Standards: Middle School Mathematics" [ CITATION Lis09 \l 1033 ]. The original resources included in the Changing Communities Lesson are no longer available on the internet. So I researched and adjusted the information to better match my goals for the lesson with my students. In addition, I merged some topics from Open Up Resources lesson called "How Crowded is This Neighborhood" [ CITATION How18 \l 1033 ]. By merging activities from these two sources, I was able to create a more culturally relevant project for my students to complete.

### **Background information:**

The Fayetteville-Manlius School District is a typical middle-class suburban school district with a total student population of 4,220. The following demographics for Wellwood Middle School were obtained at the Web site:

<https://data.nysed.gov/enrollment.php?year=2017&instid=800000040974>

[ CITATION dat18 \l 1033 ]. This data is obtained using the school district Basic Educational Data System (BEDS) form for the 2016-2017 school year. Wellwood reported a total enrollment of 651 students.

#### Wellwood Middle School Ethnicity

Race	Number of Students (percent)
Black or African American	24 (4%)
Hispanic or Latino	22 (3%)
Asian or Native Hawaiian/Other Pacific Islander	45 (7%)
White	548 (84%)
Multiracial	12 (2%)

Enrollment by Gender: 327 Male (50%)      Female: 324 (50%)

English Language Learners: 6 (1%)      Students with Disabilities: 66 (10%)

Economically Disadvantaged: 103 (16%)

There is a lot of diversity in terms of the socio-economic status of the students' families. There are students with upper middle class families as well as students who are living in poverty and homeless. The majority of students have White middle-class to upper-middle class families. There is a lot of religious diversity among the students. Some students do not actively participate in religious

organizations. Other students participate regularly. Fayetteville-Manlius is one of the few local school districts that recognize Jewish religious holidays. Some students are immigrants from Bosnia as well as China. While most students have spent several years in the Fayetteville-Manlius School District, some students have recently moved into the district.

There is also diversity in terms of the adults living in the students' households. Some students have both parents at home (a mother and father, two mothers, or two fathers). Some students are being raised by their grandparents because their parents have abandoned them, are imprisoned, or do not have custody rights. Some students are adopted and still in contact with their biological families. Some students are adopted and have not contact with their biological families. Some families are single-parent households. Some families share children between two households. One student even had a unique situation where she stayed in the same house, but the parents rotated who stayed with her throughout the week. There are blended families as well as multi-racial families. Some students are in foster care and have supervised visits with biological parents. Some students are dealing with severe emotional difficulties such as depression, suicidal thoughts and oppositional/defiant behavior. Some students are in the middle of custody trials and meeting with judges to determine custody rights of parents. Some students have orders of protection against one or both parents. When you consider more than just racial backgrounds, there is a lot of diversity among the students in my school.

**Highlighted Multicultural Components:**

When I taught percent and percent change in the past, I typically gave students numbers both with and without a context. I would give a typical problem such as “4 is what percent of 20?” or “If there are 6 red marbles and 8 blue marbles, what percent of the marbles are red? Similarly, for percent change I would ask students to find the percent change from 5 to 26 or the percent change from \$12 to \$2. With this revamped lesson, I am incorporating students’ cultural needs and awareness of cultural diversity by utilizing demographic data of race across time. Students will investigate demographic information of the local school district compared to the national demographic data across several years. I would like to increase the diversity awareness of my students in terms of race and how race statistics are changing. For this lesson, students will work with a group of three assigned by me. This will allow me to create diverse groups to explore the data together. In addition, the demographics give students a context for percent and percent change. My goal is for students to develop an understanding of the cultures within our own community as well as the national community and notice any changes, patterns or trends in the data. There is a perception among the community that there is little diversity among the students at Wellwood. I would like the students to dispel this image. By giving a context to statistics that the students are analyzing, I will meet their cultural needs.

**Technology Component:** Students will use technology to access various Web sites to obtain demographic statistics of the local school district, Onondaga County, New York State, and the United States. They will then create data display (either

circle graphs or bar graphs) of the different data sets for the various regions. In addition to using technology to access the data, students will also record and analyze their data using Google documents. They will access the Google document through a link on the class Schoology Web site. This Google document is at the following link:

[https://docs.google.com/document/d/1JnSt1hkN8q8NMMf\\_fD9XT5VY71FxFIbVASJaOeib2C0/edit?usp=sharing](https://docs.google.com/document/d/1JnSt1hkN8q8NMMf_fD9XT5VY71FxFIbVASJaOeib2C0/edit?usp=sharing)

A print copy of the handout document is included in Appendix A. An answer key for the handout is available as a Google document at the following link:

<https://docs.google.com/document/d/1-AHCddYViLbFzBxgj4cuhBBorLiReBMOH9Ewqkq1M90/edit?usp=sharing>

A print copy of the answer key for the handout document is included in Appendix B.

### **Lesson Plan (5-E model):**

#### ***Topic, Grade Level, Time***

Topic : Explore the percent change in race and ethnicity for various regions (local school district, local county, New York State, and the United States). In addition, students will investigate the percent each race and ethnicity is of the total population for each region.

Grade Level : 7th Grade Math

Time : 4-5- 42 minute class periods

#### ***Standards***

New York Common Core Learning Standards

7.RP.3	Use proportional relationships to solve multistep ratio and percent problems. Examples: simple interest, tax, markups and markdowns, gratuities and commissions, fees, percent increase and decrease, percent error.
7.SP.1	Understand that statistics can be used to gain information about a population by examining a sample of the populations; generalizations about a population from a sample are valid only if the sample is representative of that population. Understand that random sampling tends to produce representative samples and support valid inferences.

**Engage:** Students will participate in a warm up activity where they will complete the 2010 U.S. census for their current primary household. We will brainstorm as a class how the data from the U.S. Census is used to determine funding for various government programs. We will also reflect on what information is included or excluded from the U.S. Census form.

**Explore:** Students will use technology (Chromebooks and iPads) to gather demographic information about the local school district, Onondaga County, New York State, and the United States of America. They will enter this data into a Google document and then analyze this data to determine the percent of each race for the population as well as the percent change of races over time. Data sources include information from the NYS BEDS forms, PAD (Program on Applied Demographics via the New York State Labor Department at Cornell University), 2000 U.S. Census, and 2010 U.S. Census.

**Explain:** Based on their analysis of the data, students will identify patterns and changes in the data sets. They can hypothesize reasons for the changes in the populations based upon region sizes and locations. Students will apply their knowledge of percent and percent change to populations based on race. They will also create data displays (bar graphs or circle graphs) for a region assigned by me to present to the class.

**Elaborate:** Once all the groups have presented the information for their particular region, we will reflect as a class any patterns or trends that the students notice in the data sets. We will also explore the trend lines available on the Census website to further analyze the demographic statistics. For a historical context, as a class we can discuss how race and ethnicity categories for the U.S. Census have changed over time by exploring the visual timeline of the categories at the link:

[https://www.census.gov/data-tools/demo/race/MREAD\\_1790\\_2010.html](https://www.census.gov/data-tools/demo/race/MREAD_1790_2010.html) [ CITATION Mea18 \l 1033 ]

A print copy of this website is included in Appendix C. This conversation will lead to a discussion about the impact of labels and how the meaning of ethnicities have evolved and progressed throughout history.

**Evaluate:** Throughout the lesson, students will collect and analyze statistics from various Web sites. I will monitor and help students identify the appropriate data and determine the percent and percent change for the different races. I will assign each group a particular region to create either circle graphs or bar graphs of their statistics (either Fayetteville-Manlius School District, Onondaga County, New York State or the United States). Student groups will present their data displays as well as their analysis of the percent change to their peers. As a class, we will explore

any patterns students notice in their analyses of the data. We will also discuss any questions students encounter throughout this project.

**Assessment:** Throughout the project, I will engage in both formal and informal assessment. Students will share their Google documents with me so that I can offer ongoing suggestions and feedback. At the conclusion of the project, students will independently analyze similar data about gender for the various data sets. They will then analyze this data to determine trends and patterns they notice for gender as well as create bar graphs or circle graphs for a particular region. This assessment is included in Appendix D and at the following Google link:

[https://docs.google.com/document/d/1-KNM2zOi6FHaZNPsd7YBuyNQT4Jwe2R\\_6W1LYn1Aqql/edit?usp=sharing](https://docs.google.com/document/d/1-KNM2zOi6FHaZNPsd7YBuyNQT4Jwe2R_6W1LYn1Aqql/edit?usp=sharing)

An answer key for the assessment is included in Appendix E and also at the following Google link:

<https://docs.google.com/document/d/16gsEOJRT37TNnx4ymof49pmv6FPV21kjiLYtOQvUNfA/edit?usp=sharing>

## Appendix A: Handout for Census and Me Project

Every 10 years the United States conducts a census, which is a count of all people living in the U.S. As stated on the U.S. Census website:

“The results of the decennial census determine the number of seats for each state in the U.S. House of Representatives and are used to draw congressional and state legislative districts and to distribute more than \$675 billion in federal funds each year.”

Source: <https://www.census.gov/about/what/census-at-a-glance.html>

For this project, you will analyze and compare demographic data about the Fayetteville-Manlius School District, Onondaga County, New York State, and the United States using different data sources.

Before investigating the data, complete the information from the 2010 Census based upon your current primary household. Complete the form as if you are the current adult of your primary household. If there is information you are not sure about, such as age and birthday, use your best estimate.

Use a blue or black pen.

**Start here**

The Census must count every person living in the United States on April 1, 2010.

Before you answer Question 1, count the people living in this house, apartment, or mobile home using our guidelines.

- Count all people, including babies, who live and sleep here most of the time.

The Census Bureau also conducts counts in institutions and other places, so:

- Do not count anyone living away either at college or in the Armed Forces.
- Do not count anyone in a nursing home, jail, prison, detention facility, etc., on April 1, 2010.
- Leave these people off your form, even if they will return to live here after they leave college, the nursing home, the military, jail, etc. Otherwise, they may be counted twice.

The Census must also include people without a permanent place to stay, so:

- If someone who has no permanent place to stay is staying here on April 1, 2010, count that person. Otherwise, he or she may be missed in the census.

**1. How many people were living or staying in this house, apartment, or mobile home on April 1, 2010?**

Number of people =

**2. Were there any additional people staying here April 1, 2010 that you did not include in Question 1?**

Mark  all that apply.

- Children, such as newborn babies or foster children
- Relatives, such as adult children, cousins, or in-laws
- Nonrelatives, such as roommates or live-in baby sitters
- People staying here temporarily
- No additional people

**3. Is this house, apartment, or mobile home —**  
Mark  ONE box.

- Owned by you or someone in this household with a mortgage or loan? *Include home equity loans.*
- Owned by you or someone in this household free and clear (without a mortgage or loan)?
- Rented?
- Occupied without payment of rent?

**4. What is your telephone number? We may call if we don't understand an answer.**

Area Code + Number

-   -

OMB No. 0607-0919-C: Approval Expires 12/31/2011.

Form **D-61** (1-15-2009)

**5. Please provide information for each person living here. Start with a person living here who owns or rents this house, apartment, or mobile home. If the owner or renter lives somewhere else, start with any adult living here. This will be Person 1.**

What is Person 1's name? *Print name below.*

Last Name

First Name  MI

**6. What is Person 1's sex? Mark  ONE box.**

- Male  Female

**7. What is Person 1's age and what is Person 1's date of birth?**

*Please report babies as age 0 when the child is less than 1 year old.*  
*Print numbers in boxes.*

Age on April 1, 2010  Month  Day  Year of birth

→ **NOTE: Please answer BOTH Question 8 about Hispanic origin and Question 9 about race. For this census, Hispanic origins are not races.**

**8. Is Person 1 of Hispanic, Latino, or Spanish origin?**

- No, not of Hispanic, Latino, or Spanish origin
- Yes, Mexican, Mexican Am., Chicano
- Yes, Puerto Rican
- Yes, Cuban
- Yes, another Hispanic, Latino, or Spanish origin — *Print origin, for example, Argentinean, Colombian, Dominican, Nicaraguan, Salvadoran, Spaniard, and so on.* ↗

**9. What is Person 1's race? Mark  one or more boxes.**

- White
- Black, African Am., or Negro
- American Indian or Alaska Native — *Print name of enrolled or principal tribe.* ↗

- Asian Indian  Japanese  Native Hawaiian
- Chinese  Korean  Guamanian or Chamorro
- Filipino  Vietnamese  Samoan
- Other Asian — *Print race, for example, Hmong, Laotian, Thai, Pakistani, Cambodian, and so on.* ↗  Other Pacific Islander — *Print race, for example, Fijian, Tongan, and so on.* ↗

- Some other race — *Print race.* ↗

**10. Does Person 1 sometimes live or stay somewhere else?**

No  Yes — Mark  all that apply.

- In college housing  For child custody
- In the military  In jail or prison
- At a seasonal or second residence  In a nursing home
- For another reason

11

→ If more people were counted in Question 1, continue with Person 2.

1. Print name of **Person 2**

Last Name

First Name  MI

2. How is this person related to Person 1? Mark  ONE box.

- |   |  |
|---|--|
| <input type="checkbox"/> Husband or wife            | <input type="checkbox"/> Parent-in-law                 |
| <input type="checkbox"/> Biological son or daughter | <input type="checkbox"/> Son-in-law or daughter-in-law |
| <input type="checkbox"/> Adopted son or daughter    | <input type="checkbox"/> Other relative                |
| <input type="checkbox"/> Stepson or stepdaughter    | <input type="checkbox"/> Roomer or boarder             |
| <input type="checkbox"/> Brother or sister          | <input type="checkbox"/> Housemate or roommate         |
| <input type="checkbox"/> Father or mother           | <input type="checkbox"/> Unmarried partner             |
| <input type="checkbox"/> Grandchild                 | <input type="checkbox"/> Other nonrelative             |

3. What is this person's sex? Mark  ONE box.

- Male  Female

4. What is this person's age and what is this person's date of birth?

Please report babies as age 0 when the child is less than 1 year old.  
Print numbers in boxes.

Age on April 1, 2010    Month    Day    Year of birth  
           

→ NOTE: Please answer BOTH Question 5 about Hispanic origin and Question 6 about race. For this census, Hispanic origins are not races.

5. Is this person of Hispanic, Latino, or Spanish origin?

- No, not of Hispanic, Latino, or Spanish origin  
 Yes, Mexican, Mexican Am., Chicano  
 Yes, Puerto Rican  
 Yes, Cuban  
 Yes, another Hispanic, Latino, or Spanish origin — Print origin, for example, Argentinean, Colombian, Dominican, Nicaraguan, Salvadoran, Spaniard, and so on. ↗

6. What is this person's race? Mark  one or more boxes.

- White  
 Black, African Am., or Negro  
 American Indian or Alaska Native — Print name of enrolled or principal tribe. ↗

- |  |   |  |
|--|---|--|
| <input type="checkbox"/> Asian Indian  | <input type="checkbox"/> Japanese   | <input type="checkbox"/> Native Hawaiian       |
| <input type="checkbox"/> Chinese   | <input type="checkbox"/> Korean   | <input type="checkbox"/> Guamanian or Chamorro |
| <input type="checkbox"/> Filipino  | <input type="checkbox"/> Vietnamese   | <input type="checkbox"/> Samoan                |
| <input type="checkbox"/> Other Asian — Print race, for example, Hmong, Laotian, Thai, Pakistani, Cambodian, and so on. ↗ | <input type="checkbox"/> Other Pacific Islander — Print race, for example, Fijian, Tongan, and so on. ↗ |  |

- Some other race — Print race. ↗

7. Does this person sometimes live or stay somewhere else?

- No  Yes — Mark  all that apply.
- |  |   |
|--|---|

## Demographics for Fayetteville-Manlius School District

Every year, New York State school districts record data about the demographics of their student populations. This information is collected by New York State and used to determine program funding. For this portion of the project, you will access the Basic Educational Data System (BEDS) information for the Fayetteville-Manlius School District. Complete the table for the years 2012-2013 and 2016-2017 and record the number of students enrolled in Fayetteville-Manlius Central School District based on ethnicity.

For the 2012-2013 data, use the link: <https://data.nysed.gov/enrollment.php?year=2013&instid=800000040971>

For the 2016-2017 data, use the link: <https://data.nysed.gov/enrollment.php?year=2017&instid=800000040971>

Determine the percent of the total enrollment for each ethnicity for the 2012-2013 and the 2016-2017 data.

Fayetteville-Manlius School District Student Demographics: Percent

Ethnicity	2012-2013	Percent of 2012-2013 Total Enrollment (Rounded to the nearest tenth of a percent)	2016-2017	Percent of 2016-2017 Total Enrollment (Rounded to the nearest tenth of a percent)
American Indian or Alaska Native				
Black or African-American				
Hispanic or Latino				
Asian or Native Hawaiian/Other Pacific Islander				
White				
Multiracial				
<b>Total Enrollment</b>				

Determine the percent change for each ethnicity from 2012-2013 to 2016-2017.

Fayetteville-Manlius School District Student Demographics: Percent Change

Ethnicity	2012-2013	2016-2017	Percent Change (Rounded to the nearest tenth of a percent)
American Indian or Alaska Native			
Black or African-American			
Hispanic or Latino			
Asian or Native Hawaiian/Other Pacific Islander			
White

Your teacher will assign you one region to present to the class. For the region you are assigned, as a group create either circle graphs or bar graphs for each year of the race data. In your presentation, include at least three things you noticed or wondered about for your region's data about the percent and percent change for race.

## Appendix B: Answer Key for Census and Me Project

Changing Demographics: Data, Data, Data

Census and Me

Every 10 years the United States conducts a census, which is a count of all people living in the U.S. As stated on the U.S. Census website:

“The results of the decennial census determine the number of seats for each state in the U.S. House of Representatives and are used to draw congressional and state legislative districts and to distribute more than \$675 billion in federal funds each year.”

Source: <https://www.census.gov/about/what/census-at-a-glance.html>

For this project, you will analyze and compare demographic data about the Fayetteville-Manlius School District, Onondaga County, New York State, and the United States using different data sources.

Before investigating the data, complete the information from the 2010 Census based upon your current primary household. Complete the form as if you are the current adult of your primary household. If there is information you are not sure about, such as age and birthday, use your best estimate.

Use a blue or black pen.

**Start here**

The Census must count every person living in the United States on April 1, 2010.

Before you answer Question 1, count the people living in this house, apartment, or mobile home using our guidelines.

- Count all people, including babies, who live and sleep here most of the time.

The Census Bureau also conducts counts in institutions and other places, so:

- Do not count anyone living away either at college or in the Armed Forces.
- Do not count anyone in a nursing home, jail, prison, detention facility, etc., on April 1, 2010.
- Leave these people off your form, even if they will return to live here after they leave college, the nursing home, the military, jail, etc. Otherwise, they may be counted twice.

The Census must also include people without a permanent place to stay, so:

- If someone who has no permanent place to stay is staying here on April 1, 2010, count that person. Otherwise, he or she may be missed in the census.

**1. How many people were living or staying in this house, apartment, or mobile home on April 1, 2010?**

Number of people =

**2. Were there any additional people staying here April 1, 2010 that you did not include in Question 1? Mark  all that apply.**

- Children, such as newborn babies or foster children
- Relatives, such as adult children, cousins, or in-laws
- Nonrelatives, such as roommates or live-in baby sitters
- People staying here temporarily
- No additional people

**3. Is this house, apartment, or mobile home — Mark  ONE box.**

- Owned by you or someone in this household with a mortgage or loan? *Include home equity loans.*
- Owned by you or someone in this household free and clear (without a mortgage or loan)?
- Rented?
- Occupied without payment of rent?

**4. What is your telephone number? We may call if we don't understand an answer.**

Area Code + Number

-   -

OMB No. 0607-0919-C: Approval Expires 12/31/2011.

Form **D-61** (1-15-2009)

**5. Please provide information for each person living here. Start with a person living here who owns or rents this house, apartment, or mobile home. If the owner or renter lives somewhere else, start with any adult living here. This will be Person 1.**

What is Person 1's name? *Print name below.*

Last Name

First Name  MI

**6. What is Person 1's sex? Mark  ONE box.**

- Male  Female

**7. What is Person 1's age and what is Person 1's date of birth?**

*Please report babies as age 0 when the child is less than 1 year old.*

*Print numbers in boxes.*

Age on April 1, 2010 Month Day Year of birth

→ **NOTE: Please answer BOTH Question 8 about Hispanic origin and Question 9 about race. For this census, Hispanic origins are not races.**

**8. Is Person 1 of Hispanic, Latino, or Spanish origin?**

- No, not of Hispanic, Latino, or Spanish origin
- Yes, Mexican, Mexican Am., Chicano
- Yes, Puerto Rican
- Yes, Cuban
- Yes, another Hispanic, Latino, or Spanish origin — *Print origin, for example, Argentinean, Colombian, Dominican, Nicaraguan, Salvadoran, Spaniard, and so on.* ↴

**9. What is Person 1's race? Mark  one or more boxes.**

- White
- Black, African Am., or Negro
- American Indian or Alaska Native — *Print name of enrolled or principal tribe.* ↴

- Asian Indian  Japanese  Native Hawaiian
- Chinese  Korean  Guamanian or Chamorro
- Filipino  Vietnamese  Samoan
- Other Asian — *Print race, for example, Hmong, Laotian, Thai, Pakistani, Cambodian, and so on.* ↴  Other Pacific Islander — *Print race, for example, Fijian, Tongan, and so on.* ↴

- Some other race — *Print race.* ↴

**10. Does Person 1 sometimes live or stay somewhere else?**

- No  Yes — *Mark  all that apply.*
- In college housing  For child custody
- In the military  In jail or prison
- At a seasonal or second residence  In a nursing home
- For another reason

1. Print name of **Person 2**

Last Name

First Name  MI

2. How is this person related to Person 1? Mark  ONE box.

- Husband or wife
- Biological son or daughter
- Adopted son or daughter
- Stepson or stepdaughter
- Brother or sister
- Father or mother
- Grandchild
- Parent-in-law
- Son-in-law or daughter-in-law
- Other relative
- Roomer or boarder
- Housemate or roommate
- Unmarried partner
- Other nonrelative

3. What is this person's sex? Mark  ONE box.

- Male
- Female

4. What is this person's age and what is this person's date of birth?

Please report babies as age 0 when the child is less than 1 year old. Print numbers in boxes.

Age on April 1, 2010  Month  Day  Year of birth

→ NOTE: Please answer BOTH Question 5 about Hispanic origin and Question 6 about race. For this census, Hispanic origins are not races.

5. Is this person of Hispanic, Latino, or Spanish origin?

- No, not of Hispanic, Latino, or Spanish origin
- Yes, Mexican, Mexican Am., Chicano
- Yes, Puerto Rican
- Yes, Cuban
- Yes, another Hispanic, Latino, or Spanish origin — Print origin, for example, Argentinean, Colombian, Dominican, Nicaraguan, Salvadoran, Spaniard, and so on. ↗

6. What is this person's race? Mark  one or more boxes.

- White
- Black, African Am., or Negro
- American Indian or Alaska Native — Print name of enrolled or principal tribe. ↗

- Asian Indian
- Chinese
- Filipino
- Other Asian — Print race, for example, Hmong, Laotian, Thai, Pakistani, Cambodian, and so on. ↗

## Demographics for Fayetteville-Manlius School District

Every year, New York State school districts record data about the demographics of their student populations. This information is collected by New York State and used to determine program funding. For this portion of the project, you will access the Basic Educational Data System (BEDS) information for the Fayetteville-Manlius School District. Complete the table for the years 2012-2013 and 2016-2017 and record the number of students enrolled in Fayetteville-Manlius Central School District based on ethnicity.

For the 2012-2013 data, use the link: <https://data.nysed.gov/enrollment.php?year=2013&instid=800000040971>

For the 2016-2017 data, use the link: <https://data.nysed.gov/enrollment.php?year=2017&instid=800000040971>

Determine the percent of the total enrollment for each ethnicity for the 2012-2013 and the 2016-2017 data.

Fayetteville-Manlius School District Student Demographics: Percent

Ethnicity	2012-2013	Percent of 2012-2013 Total Enrollment (Rounded to the nearest tenth of a percent)	2016-2017	Percent of 2016-2017 Total Enrollment (Rounded to the nearest tenth of a percent)
American Indian or Alaska Native	9	$\frac{9}{4344} \approx 0.2$	7	$\frac{7}{4220} \approx 0.2$
Black or African-American	130	$\frac{130}{4344} \approx 3.0$	133	$\frac{133}{4220} \approx 3.2$
Hispanic or Latino	103	$\frac{103}{4344} \approx 2.3$	128	$\frac{128}{4220} \approx 3.0$
Asian or Native Hawaiian/Other Pacific Islander	366	$\frac{366}{4344} \approx 8.4$	398	$\frac{398}{4220} \approx 9.4$
White	3691	$\frac{3691}{4344} \approx 85.0$	3460	$\frac{3460}{4220} \approx 82.0$
Multiracial	45	$\frac{45}{4344} \approx 1.0$	94	$\frac{94}{4220} \approx 2.2$
<b>Total Enrollment</b>	<b>4344</b>	$\frac{4344}{4344} = 100$	<b>4220</b>	$\frac{4220}{4220} = 100$

Use the data to determine the percent change in each ethnicity from 2012-2017.

Fayetteville-Manlius School District Student Demographics: Percent Change

Ethnicity	2012-2013	2016-2017	Percent Change (Rounded to the nearest tenth of a percent)
American Indian or Alaska Native	9	7	$\frac{2}{9} \approx 22.2$
Black or African-American	130	133	$\frac{3}{130} \approx 2.3$
Hispanic or Latino	103	128	$\frac{25}{103} \approx 24.3$
Asian or Native Hawaiian/Other Pacific Islander	366	398	$\frac{32}{366} \approx 8.7$
White	3691	3460	$\frac{-231}{3691} \approx -6.3$
Multiracial	45	94	$\frac{249}{45} \approx 108.9$
Total Enrollment	4344	4220	$\frac{-124}{4344} \approx -2.9$

Similar data about race of people living in Onondaga County is available through the New York State Department of Labor.

Click on the link below and then select the Population by Race table for counts. When you click on one of the graphs, you will be taken to the data table. Record the data for race in the following table for the years 2012 and 2017.

<https://pad.human.cornell.edu/counties/trends1geo.cfm?geo=67>

Use the data to determine the percent change in each race from 2012 to 2016. For the Total Population use the table "Total Population" and select Population Counts.

Onondaga Country Population by Race: Percent

Race	2012	Percent of the 2012 Total Population (Rounded to the nearest tenth of a percent)	2016	Percent of the 2016 Total Population (Rounded to the nearest tenth of a percent)
White Non-Hispanic	367316	$\frac{367316}{467646} \approx 78.5$	359363	$\frac{359363}{465398} \approx 77.2$

Some Other Race	15259073	19107368	$\frac{3748295}{15259073} \approx 24.4$
Two or More Races	6826228	9009073	$\frac{2182845}{6826228} \approx 32.0$
Hispanic or Latino	35305818	50477594	$\frac{15171776}{35305818} \approx 43.0$
Total Population	281421906	308745538	$\frac{27323632}{281421906} \approx 9.7$

Your teacher will assign you one region to present to the class. For the region you are assigned, as a group create either circle graphs or bar graphs for each year of the race data. In your presentation, include two things you noticed or wondered about for your region's data about the percent change for race.

## Appendix D: Assessment for Gender Data

### Assessment:

Diversity is also evident in populations in terms of gender. Complete each of the following tables to determine the percent change for each gender for the given years. Remember to show your work for determining the percent for each gender.

Fayetteville-Manlius School District Student Demographics: Percent

Gender	2012-2013	Percent of the 2012-2013 Total Enrollment (Rounded to the nearest tenth of a percent)	2016-2017	Percent of the 2016-2017 Total Enrollment (Rounded to the nearest tenth of a percent)
Female	2,144		2,110	
Male	2,200		2,110	
<b>Total Enrollment</b>	<b>4,344</b>		<b>4,220</b>	

Determine the percent change for each gender from 2012-2013 to 2016-2017.

Fayetteville-Manlius School District Student Demographics: Percent Change

Gender	2012-2013	2016-2017	Percent Change (Rounded to the nearest tenth of a percent)
Female	2,144	2,110	
Male	2,200	2,110
