

Shared this document with all group members. One document needs to be shared with me.

After your redesign start to remodel your boat. If you need to add material write it on the cost sheet.

After final test of boat answer the following questions. All answers should be in complete sentences.

1) Describe what happened when your boat was tested for floating and holding pennies.

2) How many pennies did your final boat hold?

3) Pennies weigh about 2.5 grams each. How much did your final boat cost per gram it held?

4) What were your successes for this challenge?

5) What were your challenges for this challenge?

6) How could you have further modify your boat to hold more pennies?
