

Weather/Wind Investigation By Star Treff

The engaging context is the video that shows the spiderlings using the wind to travel.(Ballooning)

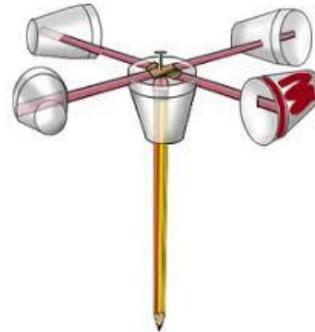

<https://www.theguardian.com/world/video/2015/may/18/australia-where-the-rain-is-sometimes-made-of-spiders-video-report>

Goals/Objectives for the lesson

Students should know how to measure wind speed(anemometer) and why it is important in nature

Integrated Stem

This is an example of iSTEM in many ways

*Data/Math:

Students will measure how far their spiderlings traveled with measuring tapes.(FT/In)

Also, they will create a bar graph with the different reading of their Anemometers.

*Technology:

Student will visit the Weatherwizkids.com site to read about wind and answer questions they might have.
