

This is my first PD Session at Montessori Country Day School! I was so nervous and excited at the same time! I have shared all about Endeavor STEM Certificate Project and all the courses I took as well as what I learned in those classes. I also shared a short video clip, attached below, to help the teachers understand how the STEM is integrated. I wanted the teachers to be familiar with Integrated STEM and how I will be teaching the students in STEM class. The teachers who attended my PD listened attentively and were very supportive. I am thankful to be working alongside these wonderful teachers.

STEM Integration in K-12 Education
