

Endeavor Presentation
Rosie Herold
Spring 2019

After discussing this presentation with my principal she has asked me to present at a half day staff PD on March 27 in my library. She has asked that I take 20-30 minutes to share my experiences and the value the program has added to my classroom, resources and teaching methods.

I plan to share highlights that are most applicable to my all of my teachers. My school is K-4th grade, so many of the reading materials are not on grade level and are too difficult for my students. As a librarian I have located many resources that exhibit the same data and information over the last three semesters. Phenomena, the 5 E model as well as many resources from my reading/writing in a STEM classroom will be valuable to my teachers. My intention is to make the PD immediately applicable with resources that teachers can take and immediately implement in their rooms.

I have asked my assistant to take pictures, so that I am able to tweet/share on social media the materials covered as well as show attendance. I will create a google form in order to gather feedback.
