

High Rise Challenge: Build a tower that can support a tennis ball at least 18 inches off the ground while withstanding the wind from a fan.

Group One

No group meet the challenge criteria with design one

Group Two

Common Issues Identified during construction:

- Structure was weak
- Toppling over (base was weak)
- Not tall enough

2nd Design Observations:

- Wider bases
- Stronger bases
- Included additional supports to help anchor structure

Take Away: Learn from your mistakes
