

Sea Urchins and Coral: A Relationship

Engage

All students experience a shared phenomena that demonstrates how science is evolving, and is self-paced.

Explore

Students work in teams to interact with multiple sources about the subject. Speaking, listening, reading and writing.

Explain

Guided Practice on the food web with students helping to explain the relationships they see.

Elaborate

Students use a Google Slides Template to create a presentation reviewing everything

Evaluate

Students show they can transfer the skills they learned by replicating the process.

Why Data Nuggets?

- Customize Level
 - Easy to Scaffold
- Strong Reading Component
- Real life cases/ studies
- Content specific vocabulary
- Transferable Skills

Why HyperDocs/ Playlists?

- Semi-Open Pacing
- Multi-Media
- Student Choice
- Lower Cognitive Load
- Differentiation/ Scaffolding
