

## Field Trip Lesson Plan 2

As the teaching and education worlds are rocked by the sudden and sometimes limiting changes from COVID-19, I have found a resource that allows students to visit a site, without leaving their computer screens. Through the Aquarium of the Pacific in Long Beach, students will learn about some of the most interesting animals in the aquarium's collection while virtually touring the Tropical Pacific, Northern Pacific, and Southern California & Baja exhibits with live camera views. Programs are tailored to be grade specific and include interactive media, games, and time to ask questions. General themes include an introduction to the different habitats of the Pacific Ocean, animal diversity, and adaptation

This resource can assign both pre-webinar and post webinar work to the students, which is provided by the aquarium.
