Quick knowledge check for students and teachers. Which of the weights on the left is equal to the weight of CO₂ produced when you burn the 6.3-pound gallon of gasoline on the right in your car? To check your answers to this go to <https://go.nasa.gov/3aXS3H9>. Now that you know how much CO₂ each gallon produces watch how CO₂ moves around the planet at - [A Year in the Life of Earth's CO₂](#). NASA has great assets for Environmental Science. #STEAM #STEM #Endeavor #NASAJPL_EDU. For quick Middle school lessons got to <https://climatekids.nasa.gov/>

I give Endeavor STEM Teaching Certificate Project permission to post this content on their social media pages.
