

Comparative Analysis of Design Models

NASA Design Model	The Works Museum	Link Engineering Design
Ask	Identify the Problem	Identify the Need or problem
Imagine	Explore	Research the Need or Problem
Plan	Design	Develop Possible Solutions
Create	Create	Select the Best Possible Solutions
Experiment	Try it Out	Construct a Prototype
Improve	Make it Better	Test and Evaluate the Solutions
		Communicate the Solutions
		Redesign

Contrasts:

Link Engineering researches the need or problem before developing possible solutions. Link Engineering spreads out the steps. NASA and The Works Museum compiles steps. Evaluates and Communicates test results

Similarities: Identifies a problem, involves brainstorming, create/construct, redesign
