

# NASA Design Model

Donna Shartzter

## ASK

How can I build a rocket using supplies like balloons, straw, string, paper, etc.

## Imagine

We talked about structure of rockets and kids could write or draw description

## Plan

I encouraged the kids to add labels and talk about how they were going to use supplies.

## Create

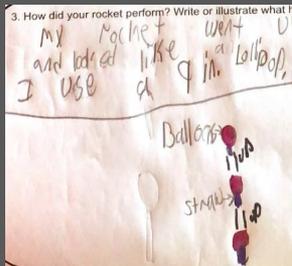

Kids built the rockets

## Experiment

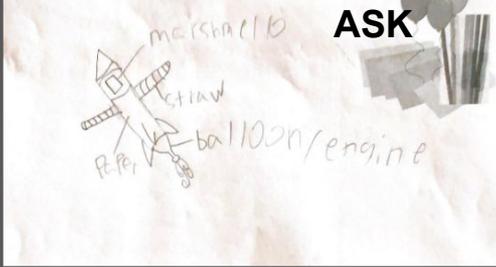

As soon as kids finished constructing they immediately started testing

## Improve

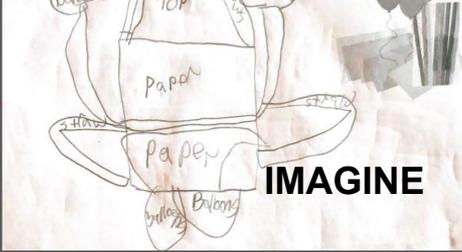

Kids made modifications automatically after testing out their rocket.

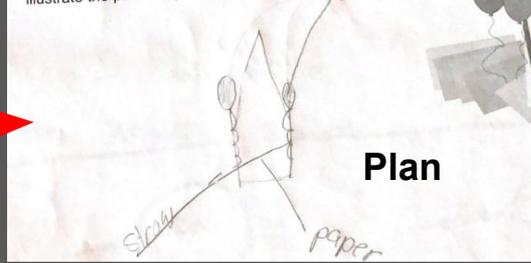

1. How can I build a rocket with balloons, straw, and paper? (Write and/or illustrate the problem.)

1. How can I build a rocket with balloons, straw, and paper? (Write and/or illustrate the problem.)
